Abstract

Abstract Text….

Plain Language Summary

plainlanguagee summary text

1 Introduction

Source: Article Notebook

Studies thinning effects in Ponderosa Pine forests found ….. (Baker, 1986)

Source: Article Notebook

Data and methods are discussed in Section 2.

Source: Article Notebook

Let x denote the number of eruptions in a year. Then, x can be modeled by a Poisson distribution

$$p(x) = \frac{e^{-\lambda}\lambda^x}{x!} \tag{1}$$

where λ is the rate of eruptions per year. Using Equation 1, the probability of an eruption in the next t years can be calculated.
